Last part is a about us and about game information

About Us

We are a startup company that creates Retro Games based on JavaScript.

This page is to demo how cool it is to play games on your web browser and provide a free version of the beta game

About the Ping Pong Game

Pong is one of the earliest arcade video games. It is a table tennis sports game featuring simple two-dimensional graphics. The game was originally manufactured by Atari, which released it in 1972.

Pong was the first commercially successful video game, which helped to establish the video game industry along with the first home console, the Magnavox Odyssey. Soon after its release, several companies began producing games that copied its gameplay, and eventually released new types of games.

On the Documentation side, there will be this document as functional documentation as well as the code of the game documented

On the page GAME, there will be the ping pong game itself

and finally a page with the open source license
